

## ADDRESS TO READERS

---

### **Dear colleagues and readers of Vestnik NovSU!**

We are pleased to present the third issue of the journal “Vestnik NovSU” in 2024, the series “Engineering Sciences”.

The purpose of every scientific journal is to spread scientific knowledge. This very strategy underlies the creation of each issue of the scientific journal Vestnik NovSU. The presentation and promotion of new knowledge to the world scientific community is facilitated by an effective peer review institute created by the editorial board, inclusion in the Abstract Journal and scientometric and bibliometric databases, open access to all materials of the issue, including uploading in the scientific electronic library (National Electronic Library “eLIBRARY.ru”), and indexing in the Russian Science Citation Index. “Vestnik NovSU” is included in the List of peer-reviewed scientific publications in which the main scientific results of dissertations for the degree of Candidate of Sciences, for the degree of Doctor of Sciences and for category K2 should be published. Professional work, highly qualified editorial staff, experienced reviewers – all these factors contribute to the growth and qualitative development of the journal “Vestnik NovSU”.

While remaining the leading scientific and educational organization in the Novgorod Region, Yaroslav-the-Wise Novgorod State University continues to increase its scientific potential in various fields of science. In 2024, the dissertation council 24.2.346.03 began its active work (order of the Ministry of Education and Science of the Russian Federation dated 17.10.2023), accepting for consideration and defense dissertations for the degree of Candidate and Doctor of Sciences in the specialties “Radiophysics” (technical sciences) and “Condensed matter Physics” (physical and mathematical sciences). The chairman of the dissertation Council is the scientific editor of our journal, Doctor of Physical and Mathematical Sciences, Honored Scientist of the Russian Federation, Professor Mirza Bichurin. Due to this there’s great interest in these areas in the third issue of the journal.

For publication in this issue, the editorial office received about 20 articles reflecting the results of promising research in the field of modern physics, semiconductor and functional electronics and radio engineering. The expansion of the geography of the authors of scientific articles (Moscow, Tomsk, Donetsk, Omsk) indicates an increase in interest in this journal not only to the local scientific community, but also far beyond the Novgorod region. It appears that the articles of this issue will be of interest to a wide range of specialists.

We remind our authors and readers that we are waiting for your suggestions and materials for publication in the scientific journal "Vestnik NovSU" by email [vestnik@novsu.ru](mailto:vestnik@novsu.ru).

*Chief Editor of the scientific journal "Vestnik NovSU",  
Vice-Rector for Research of NovSU, Dr.*

*Andrey Efremenko*
